1. Purpose, Directions of the Journal and Publication Procedure

The journal "Vestnik KEU" is a peer-reviewed, multilingual (Kazakh, English, Russian) and open scientific journal. It reviews previously unpublished scientific articles in the following areas: Economics, Philosophy, Pedagogy, Law. The pages of the journal are open for discussion materials, so its content does not necessarily reflect the point of view of the founders and the editorial board (editorial board).

This guide has been developed in accordance with the editorial policy implemented by the university, based on the order of the Minister of Education and Science of the Republic of Kazakhstan dated January 12, 2016 No. 20 "On approval of the requirements for scientific publications recommended for inclusion in the list of publications for the publication of the results of scientific activity" and the order of the Minister of Education and Science of the Republic of Kazakhstan dated March 31, 2011 No. 127 "Rules for awarding degrees".

The purpose of the journal "Vestnik KEU" is the development of domestic science through the publication and dissemination of the results of scientific research of Kazakhstani and foreign scientists in the declared areas of the journal; research can relate to various theoretical and applied issues of economics, philosophy, pedagogy and law enforcement.

The journal "Vestnik KEU" is published once a quarter (four times a year). When reprinting, a reference to the journal is required. Articles are anonymously peer-reviewed by two reviewers.

The journal's website is installed on the university server and is available at the following link: https://vestnik.keu.kz/index.php/ru/. The archive of journal issues is available at the following link: https://dorm.keu.kz/nii/archive/.

For articles accepted for consideration, the issue of the possibility of their publication is resolved within two weeks. The final decision is made based on the results of the discussion at the Editorial Board. All information about the passage of the article can be obtained by the authors on the journal's website at the link https://dorm.keu.kz/nii/.

The author submits an article and agrees to reproduce free of charge on the Internet on the website of the Karaganda University of Kazpotrebsoyuz in the section "Bulletin of KEU" the electronic version of his article published in the journal "Bulletin of KEU". The author must proceed from the understanding that access to the site is not regulated. It is not permissible to submit plagiarism as an original work and publish a previously published article.

Attention: The author's submission of an article for publication in the "Bulletin of KEU" is automatically perceived as consent to the editorial policy of the journal and the requirements of the ethics of scientific publications.

Articles submitted for publication must comply with the ethics of scientific publications. Authors are responsible for the selection and reliability of the given facts, citations, economic and statistical data, proper names, geographical names and other information, as well as for the use of data not intended for open press. Factual data, all information borrowed from literary and other sources, as well as citations given in the article, must be confirmed by appropriate references. Authors must comply with the requirements for publications.

Rejected articles are not returned to the authors. Payment of fees for publications is not provided.

Address of the editorial board: Karaganda, 9 Akademicheskaya Street, Karaganda University of Kazpotrebsoyuz, room 303, tel. +7 (7212) 44-16-24 (6564). Email: vestnik_keu@mail.ru

2. Editorial Council (Editorial Board)

The Editorial Council (Editorial Board) of the journal "Vestnik KEU" consists of the Editor-in-Chief, Deputy Editor-in-Chief, Executive Editor, editors, as well as other domestic and foreign scientists. Members of the Editorial Council (Editorial Board) must comply with the requirements of the State Order of the Ministry of Science and Higher Education of the Republic of Kazakhstan dated January 12, 2016 "On Approval of the Requirements for Scientific Publications Included in the List of Publications for the Publication of the Results of Scientific Activity".

The Editorial Board of the journal "Vestnik KEU" does not support the use of generative artificial intelligence (AI) programs to write sections of the manuscript. Authors using generative AI tools are recommended to follow the guidelines of the Committee on Publication Ethics (COPE). According to the COPE recommendations, authors who use AI tools when writing a manuscript, creating images or graphic elements of the article, as well as when collecting and analyzing data, should disclose information about how and what specific tools were used. This information should be indicated in the methodology and methods section of the manuscript. However, such indication is not required if AI tools were used only to check grammar, spelling or references.

Authors and reviewers should pay attention to the following information when submitting a manuscript or participating in the review process in the online system:

- Registration on the site (name, surname, organization, country, other data specified in the form to be filled);
- Login: login (preferably the surname of the reviewer, one of the authors), password (at least 8 characters);
- Personal account (choice of the role of the author or reviewer);
- Rules for authors (familiarization with the requirements of the journal);
- Sending the manuscript (copy with and without authors), attaching the necessary documents;
- Waiting for a response from the editorial board of the journal.

3. Publication Ethics Requirements

3.1 Ethics of the Editorial Council (Editorial Board)

The editorial board of the journal "Vestnik KEU" in its work is guided by the principles developed by the international association "Committee on Publication Ethics" (COPE, Committee on Publication Ethics) (hereinafter referred to as the Committee), and adheres to the policy of requirements for ethical behavior on the part of authors and reviewers.

In this context, the journal is based on the rules of the Committee, striving to comply with the general principles of ethical research. Researchers should familiarize themselves with this policy and comply with ethical norms and rules in their work. Research involving human subjects should be conducted based on the ethical principles set out in the Belmont Report (Ethical Principles and Guidelines for the Protection of the Rights of Subjects of Research).

The Editorial Board strives to suppress all forms of unethical behavior both on its part and on the part of the authors and reviewers. Manuscripts and articles received for publication, but unpublished, cannot be used by the Editorial Board for personal purposes.

The editorial board of the journal does not allow for publication articles rejected by reviewers as inconsistent with the scientific and ethical nature of publications.

The editorial board of the journal necessarily considers all official claims submitted to the editorial board of the journal.

The work of the editorial board of the journal is based on the principles of politeness, transparency, honesty and objectivity.

If the research is conducted with the participation of humans or animals, the authors must obtain appropriate ethical approval from the institutions in which they work and upload the document along with the manuscript. If necessary, the editorial board and reviewers can verify the authenticity of the submitted ethical approvals.

In support of the commitment to originality and integrity, the journal uses the StrikePlagiarism anti-plagiarism system. The application of StrikePlagiarism reinforces the journal's commitment to high standards of academic integrity. All submitted articles are checked for plagiarism through the StrikePlagiarism platform, and the content must be at least 70 % original. This process aims to identify and prevent accidental or intentional plagiarism, as well as to create a scientific environment focused on the dissemination of original and reliable research.

In accordance with the Order of the Minister of Education and Science of the Republic of Kazakhstan dated March 31, 2011 No. 127 "On Approval of the Rules for Awarding Degrees", "the coincidence of the names of regulatory legal acts and official documents, the names of state and other official bodies and organizations, generally accepted terms, definitions and concepts in the relevant field of science, the texts of regulatory legal acts and the works under study is not considered plagiarism, if the volume and nature of their use do not cast doubt on the independence of the completed article. Also, it is not allowed to use technical means and methods to reduce or eliminate the possibility of detecting plagiarism".

3.2 Editorial Responsibilities

3.2.1 The duties of the Editor-in-Chief include:

1. Determination of the responsibilities and activities of the members of the editorial board, editorial council.
2. Formation and approval of the direction and policy of the journal.
3. Quality control of each issue of the journal and approval of its content.
4. Holding meetings with members of the editorial board, editorial council.
5. Resolution of emerging problems.

3.2.2 Responsibilities of the executive editor:

1. Responsibility for the current work of the journal.
2. Checking the submitted manuscripts for plagiarism and for compliance with the requirements of the journal.
3. Preliminary check of manuscripts for compliance with the goals and direction of the journal.
4. Checking the compliance of manuscripts with technical requirements.
5. Making a decision on sending the manuscript for review or rejecting it.
6. Confirmation of registration of authors and reviewers.
7. Selection and appointment of suitable reviewers in accordance with the direction of the submitted manuscripts.
8. Control of review deadlines.
9. Correspondence with reviewers on the issues of articles submitted by the authors.
10. Control over the timing of revision and elimination of comments by the authors.
11. Correspondence with authors, answers to their questions.
12. Solving emerging problems within its competence.

3.2.3. Editors have the right to reject articles that violate legal regulations regarding libel, copyright infringement or plagiarism. In addition, they are obliged to maintain the confidentiality of manuscripts until they are published.

3.3 Author Ethics

The authors are fully responsible for the selection and reliability of the given facts, citations, economic and statistical data, proper names, geographical names and other information, as well as for the use of data not intended for open printing.

Factual data, all information borrowed from literary and other sources, as well as quotes given in the article, must be confirmed by appropriate references.

The authors are fully responsible for the originality of the submitted work. The submission of plagiarism as an original work and the publication of a previously published article are not allowed. Plagiarism is any borrowing of someone else's text without citation, as well as paraphrasing and borrowing ideas (research results) without reference to the author.

Authors are not allowed to publish the same article describing the same research in more than one journal or other publication. Submitting the same article to different journals at the same time is considered a violation of ethics.

Authors have a responsibility to give due recognition to the contributions of other researchers. They should cite sources that have had a significant impact on the shaping of their research. Any information obtained through personal contacts, such as through conversations or correspondence, should not be used or disseminated without the explicit written consent of the author of the original source. Likewise, information obtained through confidential processes, such as manuscript reviews or grant applications, should not be used without the express written permission of the author.

Authorship should be limited to persons who have made a significant contribution to the conception, design, execution, or analysis of the study. All persons who have made a significant contribution should be listed as co-authors. All scientists who have contributed to the study should be authors of the publication. All authors of the publication are equally responsible for its content.

Authors are required to consider the risks associated with the research subjects. If hazardous chemicals, certain procedures, or equipment were used during the study, the author should clearly indicate these risks in the manuscript. If the research was conducted with the participation of animals or humans, the manuscript should contain information that all procedures were in accordance with current legislation and institutional rules, and were approved by the relevant institutional committees. In addition, authors should confirm that they have received informed consent from the participants in the experiment. The confidentiality of personal data should always be respected.

Authors are required to indicate in their manuscript any financial or other significant conflicts of interest that may affect the results of their research and its interpretation. They should also provide information about all sources of financial support for the project.

In cases where the author discovers a significant error or inaccuracy in the published version of his work, he should immediately notify the editor of the journal and cooperate with him to correct or retract the article. If the editor receives notification from a third party about a serious error in the published work, the author should promptly make corrections, if necessary, retract the article or provide data confirming the accuracy of the original.

3.4 Reviewer ethics

A scientist with a sufficient level of professional competence in the reviewed field of science (topic, question, problem) can act as a reviewer. One of the reviewers can be a member of the editorial board (editorial board) of the journal.

The reviewer acts as an independent, anonymous expert for the author, who makes a decision on the compliance of the publication with the requirements of scientific nature and author's ethics.

A manuscript submitted for review is a confidential document and is subject to copyright law, and therefore cannot be used by the reviewer to discuss it with third parties (except for members of the editorial board) or for personal purposes.

If the reviewer considers himself insufficiently competent or biased regarding the content (the author's point of view on the problem) of the reviewed article, he should refuse to review it.

Articles submitted for review should not contain any personal information about its authors, in order to avoid bias from the point of view of the mismatch of ethnic, religious, social or other qualities of the authors and the reviewer, which are not directly related to the content of the work.

3.5 Publication fee

Publication in the scientific journal "Vestnik KEU" is paid, the fee is charged from the authors to cover publishing and other expenses related to maintaining the established requirements and rules for scientific publications. The amount of payment is set annually and depends on the costs incurred by the publishing house.

4. Procedure for reviewing articles received by to the editorial office of the journal "Vestnik KEU"

Reviewing of manuscripts of scientific articles in the editorial office of the journal "Vestnik KEU" is carried out to maintain a high scientific and theoretical level of the publication and in order to select the most relevant scientific papers.

Peer review (expert evaluation) is carried out by at least 2 independent experts from among the most authoritative scientists cooperating with the editorial board of the journal. One of the reviewers may be a member of the editorial board (editorial board).

The review process is organized by the executive editor.

The Editorial Board keeps records of the submitted manuscripts passing the review procedure.

After the author submits the article, it is checked for compliance with the basic requirements for the design of the publication and for the presence of borrowing (plagiarism).

If the article meets the requirements, two independent reviewers are appointed (in accordance with the scientific direction in which the article is submitted). Reviewing of materials submitted to the editorial board of the journal "Vestnik KEU" is carried out in confidentiality.

In articles sent for review, the author's name and place of work are not indicated (anonymous).

The reviewer must submit an expert opinion within the period agreed with the editorial board, but, as a rule, not exceeding 2 weeks.

Based on the results of the expert evaluation, the reviewer evaluates the work, gives recommendations and makes a conclusion: "Without revision", "For revision", "Elimination of comments", "Reject".

The conclusion is considered by the editor and an appropriate decision is made.

If one or both reviewers make a decision "For revision", "Elimination of comments", then the author is set a deadline in which changes should be made to the article, according to the recommendations of the reviewer. If the author makes the necessary changes within the specified period, the article again goes through the review procedure. After that, a decision is made again.

If both reviewers make a decision "Without revision", the editor makes a decision "Accepted for publication", and the article is transferred to the category of "Accepted articles" and is published in the order of general priority.

In the event that the author does not agree with the decision "For revision", "Elimination of comments" and refuses to make changes to the article, the article is not published.

In the event of disputes over publication, the decision is made by the Editor-in-Chief.

The author can track all movements on the submitted article in the editorial system at the link https://dorm.keu.kz/nii/editor/ by his username and password.

5. Requirements for the form of submission of articles

Scientific articles submitted for publication (including reviews) must correspond to the stated purpose and thematic direction of the journal and meet the following requirements:

Requirements for the text format of articles:

- Microsoft Word text editor;
- Times New Roman font, size 11 (for the main text of the article);
- Single line spacing;

• Margins: top, bottom, right, left – 2 cm each;
• Paragraph indentation – 1 cm.
The volume of the article in the specified format should not be less than 5 pages and should not exceed 10 pages.

Article structure requirements:

1. The title of the article
2. Abstract
3. Keywords (at least 7 words)
4. Introduction
5. Materials and methods
6. Results/Discussion
7. Conclusion
8. Information on financing (if available)
9. References
10. References

To transliterate Kazakh text from Cyrillic to Latin, we recommend using the online converter at https://qazlat.kz. To transliterate Russian text from Cyrillic to of the list of references into Latin: https://translitonline.com/.

Annotation Requirements:

1. The essence of the problem
2. The purpose of the study
5. Research methods used
6. Results and their significance
7. The volume of the abstract is not less than 50 and not more than 300 words.

The mandatory elements of the publication are:

• the UDC index, which should reflect the subject of the article in sufficient detail, Times New Roman, font size 11, followed by paragraph indentation;
• first name (with capital letters) and last name of the author (co-authors) (all letters are uppercase) in Russian, Kazakh and English, Times New Roman, font size 10, italics;
• information about the authors: regalia, place of work of the authors (department, position), contact information (in Russian, Kazakh and English) and e-mail, Times New Roman, 10-point font, italics, then paragraph indentation;
• the title of the article in capital letters, bold (in Russian, Kazakh and English), Times New Roman, font size 11, followed by paragraph indentation;
• the abstract of the article and keywords in Russian, Kazakh and English, Times New Roman, font size 10 (the first is the abstract in the language of the submitted publication);
• Please note: any abbreviations, including the abbreviation, are allowed only in the original language (full transcription must be provided in other language formats);
• the text of the article according to the structure in two-paragraph indents, Times New Roman, font size 11;
• references and references, paragraph indentation, Times New Roman, font size 10.

FORENSIC IDENTIFICATION IN THE INVESTIGATION OF POACHING: CRIMINAL LAW AND EVIDENTIARY ASPECTS

(Indentation)

Abstract. The article is devoted to the analysis of poaching as a complex socio-legal and environmental phenomenon that has a systemic impact on biodiversity, economy and public safety. Historical and modern aspects of illegal hunting of animals, its transregional nature and economic motivation are considered. Special attention is paid to cascading environmental effects associated with the violation of trophic links and degradation of ecosystems. The purpose of the research is to analyze the criminal law mechanisms of combating poaching in the Republic of Kazakhstan and the Russian Federation, as well as to consider the problems of law enforcement practice. The author uses general scientific and special research methods: dialectical, comparative-legal, formal-legal, historical-legal, sociological, statistical analysis. The key role of criminalistic identification in proving this category of cases is substantiated. The conclusion is made about the need to integrate forensic innovations with procedural guarantees to improve the efficiency of investigation and prevention of environmental crimes.

Keywords: poaching; forensic identification; environmental crimes; biodiversity; DNA analysis; digital traces; forensic examination; criminal law counteraction; investigation of crimes.

FORENSIC IDENTIFICATION IN THE INVESTIGATION OF POACHING: CRIMINAL LEGAL AND EVIDENTIARY ASPECTS

(Indentation)

Summary. The article is devoted to the analysis of poaching as a complex socio-legal and environmental phenomenon that systematically affects biodiversity, economy and public safety. Historical and modern aspects of illegal animal production, its transregional nature and economic motivation are considered. Special attention is paid to the cascading ecological impacts associated with the disruption of trophic connections and the degradation of ecosystems. The purpose of this study is to analyze the criminal-legal mechanisms of combating poaching in the Republic of Kazakhstan and the Russian Federation, as well as to study issues related to law enforcement agencies. General scientific and specialized research methods, including dialectical, comparative-legal, formal-legal, historical-legal, sociological and statistical analysis, have been used. The main role of forensic identification in the proof of this category of cases is based. The possibilities of using forensic genetic, traceological, ballistic and digital examinations, as well as remote monitoring technologies are being studied. A conclusion is made about the need to combine forensic medical innovations with procedural guarantees in order to increase the efficiency of investigations and prevent environmental crimes.

Keywords: poaching; forensic identification; environmental crimes; biodiversity; DNA analysis; digital traces; forensic examination; criminal legal resistance; investigation of crimes.

FORENSIC IDENTIFICATION IN POACHING INVESTIGATIONS: CRIMINAL LAW AND EVIDENTIARY ASPECTS

(Indentation)

Annotation. The article is devoted to the analysis of poaching as a complex socio-legal and ecological phenomenon that has a systemic impact on biodiversity, the economy and public safety. The historical and modern aspects of illegal animal extraction, its trans-regional nature and economic motivation are considered. Special attention is paid to cascading environmental effects associated with disruption of trophic bonds and ecosystem degradation. The purpose of this study is to analyze criminal law mechanisms for combating

poaching in the Republic of Kazakhstan and the Russian Federation, as well as to examine issues related to law enforcement. General scientific and specialized research methods were used, including dialectical, comparative legal, formal legal, historical and legal, sociological, and statistical analysis. The key role of forensic identification in proving this category of cases is substantiated. The possibilities of using forensic genetic, tracological, ballistic, and digital examinations, as well as remote monitoring technologies, are being explored. It is concluded that it is necessary to integrate forensic innovations with procedural safeguards to increase the effectiveness of the investigation and prevention of environmental crimes.

Keywords: poaching; forensic identification; environmental crimes; biodiversity; DNA analysis; digital footprints; forensic examination; criminal law enforcement; crime investigation.

Bibliography

(Indentation)

References

Link design requirements:

A reference to literature is indicated in square brackets, followed by a comma, a non-uppercase «p» dot, and a page number.

See the link design example.

«Further, based on the results of the analysis of plans for thematic areas and plans of faculties, drafts of the plan for the next planned period are drawn up» [22, p.34].

Requirements for the design of illustrations, diagrams and drawings:

All illustrations must have a name and, if necessary, explanatory information (Times New Roman 10-point caption); all illustrations must be referenced in the text of the article. The word "Drawing", its serial number, name and explanatory data are located directly below the drawing. Illustrations should be numbered in Arabic numerals, end-to-end, Times New Roman, 10-point font. If there is only one drawing, it is not numbered.

Drawings, graphs, diagrams, and illustrations published in publications must comply with the requirements of state standards.

All illustrations, diagrams, and drawings should only be in black and white and attached to the text.

See an example of the design of illustrations, diagrams, and drawings.

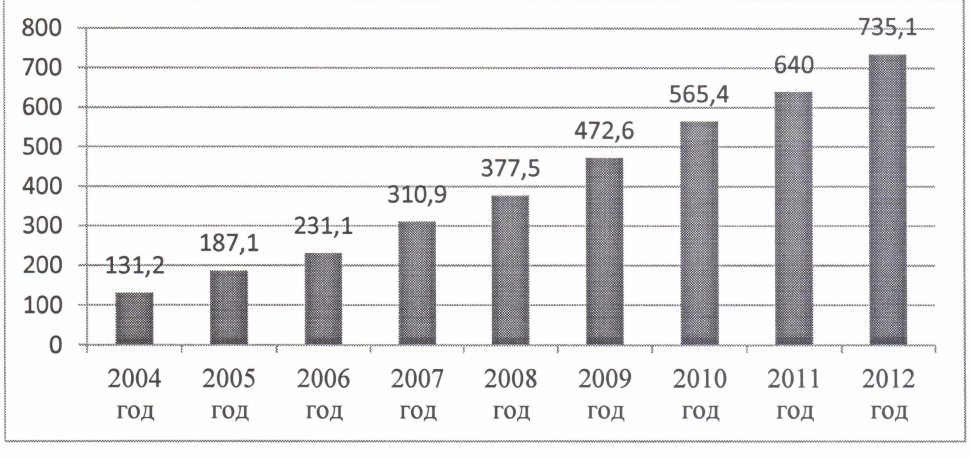

Figure 7 – Dynamics of healthcare costs in Kazakhstan

Note – Compiled by the author according to [5,9,12]

Requirements for the design of tables:

All tables must have a name (Times New Roman, font size10) and links in the text. The name should reflect the content, be precise and concise, and be placed above the table.

The table should be placed immediately after the paragraph in which it is mentioned for the first time. A table with a large number of rows can be moved to another page.

Graph headings are usually written parallel to the rows of the table; if necessary, the perpendicular arrangement of graph headings is allowed. Data inside the table: Times New Roman, font size10.

All tables should be attached to the text.

See an example of the design of tables

Table 1 – Labor productivity data in the extractive and manufacturing industries of Kazakhstan

Industries	Year 2009	Year 2010	January-July 2011
Mining and quarrying (in thousands of USD/person)	150,1	181,7	141,9
Manufacturing industry (in thousands of USD/person)	30,3	43,1	24,4
Note – Compiled by the author based on the data of the Statistics Agency of the Republic of Kazakhstan [12]			

Requirements for the design of the list of references and References:

The **reference** list should be presented as a separate section in accordance with ГОСТ Р 7.5–98 / ГОСТ 7.1-2003 edition style in the original language of the cited works. Each source must be properly referenced.

When designing the literature, specify:

• Author (surname and initials in italics) – (Bendina N.V.)

• Name of the source, without quotation marks with capital letters - (Marketing (lecture notes): An exam preparation manual), put a period, a hyphen. The city is indicated after the hyphen, the colon ":" is placed; the publisher is written after the comma; the year of publication is written (– M: Prior, 2000.)

• After the dot and the hyphen, the number of pages is indicated and the letter "p" is placed, followed by a dot (123 p.)

When designing periodicals, the following are indicated

• Author (surname and initials)

• Title of the article, without quotation marks, with capital letters, two slashes //

• The name of the source (magazine, newspaper) with a capital letter, followed by a dot and a dash

• Year of issue (dot, dash), no. (dot, dash), then the pages containing the information (P.1-127.)

• When using information from the Internet, it is indicated: [Electronic resource] and Access mode:

The list of references is given as cited in the article, Times New Roman, font size 10.

See the example of the design of the List of references
